Art Unit: 3611

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Claims 1-7, 10, 11 and 13-19 are objected to because of the following informalities: In the preamble of claims 1 and 11, "a handlebars" is incorrect. Appropriate correction is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2 and 13, the term "generally" is vague and indefinite.

In claim 13, "its storage position" lacks antecedent basis.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Ripley.

Since Ripley discloses the structure as claimed, the device is inherently capable of functioning as claimed.

7. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Fahey.

Since Fahey discloses the structure as claimed, the device is inherently capable of functioning as claimed.
